

ISO9001

BIRCH VENEERED PLYWOOD

Composition

Birch plywood is a panel made up of many sheets (layers) of birch veneer. Once the panel has been properly sanded and calibrated it can be covered with various veneers.

Applications and Use

Panel very strong, with good stability. Thanks to the mechanical properties of birch it is ideal for outdoor use or in damp areas. In high-end carpentry, it is used for kitchen and bathroom furniture.

Gluing

According to the UNI-EN 314-2 standards Class 3

Specific weight

about 750 kg/m³

Dimensions

2490x1240 mm

3040x1520 mm

Thicknesses

From 7 mm to 51 mm
