

ISO9001

"SIFAR-LAC" PANEL

Composition

Panel composed of a poplar or fir blockboard core and 3-mm thick MDF exteriors painted white.

Applications and Use

Used for high-quality furnishings, where stability and strength is required. It is a product suitable to be subsequently lacquered with either solvent or water-based products. Before being treated, it should be lightly sanded to allow the finishing products to adhere. The panel may have some small imperfections or uneven colour coverage.

Gluing

According to the UNI-EN 314-2 standards Class 1

Specific weight

about 520-530 kg/m³

Standard dimensions

3120x1230 mm

Standard thicknesses

18-20-25-30 mm

Note: Other thicknesses and sizes upon request
