

SIFARBALZ

Composition

3-layer composite panel consisting of two outer layers of marine plywood (on specific request with RINA approval) and a central balsa wood core.

Applications and Use

Used for the production of furniture and in installations that must be extremely light. Excellent absorption of sound waves and vibrations, also ideal for thermal insulation.

Gluing

According to the UNI-EN 314-2 standards Class 3

Dimensions

2490x1210 mm

3090x1520 mm

Thicknesses

from 12 to 60 mm

Density

Balsa wood: 160 kg/m³

Panel weight 20 mm (4 mm okoumé + 12 mm balsa wood core + 4 mm okoumé): 6.24 kg/m²

Technical features

- *Very light*
- *Practical and easy to work*
- *Acoustic and thermal insulation*
