## VENEERED BLOCKBOARD

### Composition

Central core formed by poplar or fir strips of the same width, covered with poplar or fromager veneer ennobled with precious woods.

It is possible to produce a 5-layer panel (only one layer of veneer per side) or 7-layer (double layer of veneer).

It is even possible to cover blockboard with MDF.

### Applications and Use

Due to its characteristics of stability and lightness, it is suitable for making high-quality, high-end furniture and furnishings.

### Gluing

According to the UNI-EN 314-2 standards Class 1

### Specific weight

about 400-420 kg/m<sup>3</sup> for poplar core

about 420-440 kg/m<sup>3</sup> for fir core

### Standard dimensions

3120x1870 mm

3660x1870 mm - *subject to availability of the sliced length*

### Standard thicknesses

5-layer blockboard: 15-16-18-19-20-21-23-25-26-30-31 mm

7-layer blockboard: 16-18-19-20-21-23-25-26-30-31-36-40 mm

Note: Other thicknesses and sizes upon request
